OPTIMUM TECHNOLOGY MATCHING® STRATEGY

RFMD's success is driven in part by our deep design expertise in multiple semiconductor process technologies—GaAs HBT, Si BiCMOS, SiGe BiCMOS, GaAs MESFET, Si CMOS, InGaP HBT, GaAs pHEMT and GaN HEMT—and our Optimum Technology Matching® (OTM) strategy. Through OTM, RFMD engineers match the appropriate technologies to each product according to the best possible combination of price and performance.

MANUFACTURING LOCATIONS

Beijing, China: Semiconductor assembly; internal module packaging; test, and tape and reel assembly

Brooksville, FL: Multi-chip module manufacturing and test

Broomfield, CO: Defense and power device assembly and test

Greensboro, NC: Custom Foundry Services (GaN, GaAs, and MBE); Molecular beam epitaxial; compound semiconductor fabrication and test; UHV parts cleaning services

Newton Aycliffe, UK: GaAs pHEMT fabrication facility

Nuremberg, Germany: CATV component manufacturing
